Career Objective

Flutter Mobile App Developer and final-year Computer Science and Engineering student with experience in cross-platform application development, Firebase integration, backend APIs, and real-world software project implementation. Skilled in building scalable applications using Flutter, Firebase, Django, and FastAPI, with strong problem-solving ability and competitive programming knowledge. Passionate about developing production-ready applications, reusable Flutter packages, AI-integrated systems, and impactful software solutions.

Experience

Junior Software Developer - Flutter

November 2025 – February 2026

MemoNEET

Remote / Bangladesh

- Developed and maintained Flutter-based mobile application features with clean UI, responsive layouts, and reusable widgets.
- Integrated REST APIs and Firebase services for authentication, database operations, and real-time data handling.
- Improved application performance, fixed bugs, and collaborated with the development team to deliver stable releases.
- Worked with state management, modular project structure, and version control using Git/GitHub.

Flutter Developer / Project Developer

2023 – Present

Academic and Personal Projects

Bangladesh

- Built multiple Flutter applications for Android, web, and desktop with Firebase backend integration.
- Designed and implemented authentication systems, Firestore databases, profile management, dashboards, notifications, and file upload features.
- Developed reusable Flutter components and package-style solutions for form handling and SQL-related workflows.
- Worked on AI-integrated applications using Gemini API, speech-to-text, and machine learning-based features.

Projects

Schedula – Cross-Platform Class Scheduling App

[\[GitHub\]](#)

- Developed a class scheduling application with features for adding, editing, and deleting class schedules.
- Implemented notes, announcements, downloadable files, profile management, notifications, and Firebase backend storage.
- Added an AI chatbot module powered by Gemini API to assist students with academic queries.
- *Tech Stack:* Flutter, Dart, Firebase, Firestore, Firebase Storage, Gemini API.

form_flutter – Reusable Flutter Form Package

[\[GitHub\]](#)

- Developed a reusable Flutter package for schema-friendly form creation and form state management.
- Built reusable field widgets, validators, controller-based state handling, and preset form catalogs.
- Designed the package to reduce repetitive form UI code and improve consistency across Flutter projects.
- *Tech Stack:* Flutter, Dart, reusable widgets, validation logic, form controller state.

anysql – SQL Utility Package

[\[GitHub\]](#)

- Built a SQL-focused utility project to practice and simplify database-related operations.
- Implemented structured SQL workflow concepts for handling queries and database interaction logic.
- Designed the project as a learning and productivity tool for working with SQL-based systems.
- *Tech Stack:* SQL, database logic, query handling, backend-oriented development.

Lecture Recorder and AI Powered Study App

[\[GitHub\]](#)

- Built a mobile application that records class lectures and converts speech into text for academic use.
- Integrated AI-based exam question generation from lecture transcripts using Gemini API.
- Added features for question management, transcription improvement, and study content organization.
- *Tech Stack:* Flutter, Dart, Firebase, Speech-to-Text, audio recording, AI integration.

Hospital Management System

[GitHub]

- Developed a hospital management application with patient, doctor, and appointment management features.
- Implemented authentication, profile management, appointment status handling, and dashboard-based navigation.
- Designed admin and doctor-side features for monitoring appointments and patient records.
- Tech Stack:* Flutter, Dart, Firebase Auth, Cloud Firestore, dashboard UI.

Technologies

Languages: Dart, Python, JavaScript, Java, C++, C, SQL
Mobile & Frontend: Flutter, Android, Cross-Platform App Development
Backend & APIs: Django, FastAPI, REST API
Databases & Cloud: Firebase Authentication, Cloud Firestore, Firebase Storage, PostgreSQL, MySQL
AI & ML: Gemini API, Google Speech-to-Text, Whisper, Google ML Kit, TensorFlow Lite
IoT & Hardware: Raspberry Pi, ESP32, Sensors, Bluetooth Communication, Aurduino, Camera Streaming
DevOps & Tools: Git, GitHub, VS Code, Android Studio, Cursor, Postman, Overleaf
Other Skills: Competitive Programming, Algorithm Design, Problem Solving, UI/UX Design

Education

Patuakhali Science and Technology University <i>B.Sc. (Engg.) in Computer Science and Engineering</i>	2022 – Present <i>Dumki, Patuakhali, Bangladesh</i>
Maheshpur Govt. Degree College <i>Higher Secondary Certificate – Science</i>	Year of 2020 <i>GPA: 5.00</i>
Maheshpur Govt. Pilot High School <i>Secondary School Certificate – Science</i>	Year of 2018 <i>GPA: 5.00</i>

Achievements & Activities

- CSE Club, PSTU**
 - Vice President:** Contributing to leadership, event planning, technical activities, and student community development.
 - Programming Bootcamp Coordinator:** Organized and mentored programming bootcamps and contests, promoting hands-on problem-solving among students.
- Competitive Programming Enthusiast:** Solved 385+ problems on Codeforces with a contest rating of 1048 and max rating of 1078 in the Newbie division. Handle: [Azrul_Amaline](#)
- Problem Solving Skills:** Practiced algorithmic topics including implementation, mathematics, greedy algorithms, brute force, strings, constructive algorithms, sorting, number theory, dynamic programming, and geometry.
- Bdapps Mobile App Challenge:** Participated in a national-level mobile app development competition.
- National Cyber Drill 2022:** Participated and achieved 32nd rank in Bangladesh.
- Python Django Training:** Completed training under Bangladesh Computer Council.
- Cisco Networking Academy:** Completed basic computer networking course.
